

Project Overview:

Fourpure is a London based family brewery founded in 2013 by brothers Dan & Tom Lowe. Since their launch in 2013, they have committed to producing the highest quality beers and being at the forefront of brewing innovation and efficiency. Early in 2014 Fourpure were the first UKbased craft brewery to start to can their core range. Cans, with their protection from light and superior seal, combined with lower environmental impact, help Fourpure to get the beer to the client in the best possible condition!. As part of their plans for expansion of the brewery and after consulting with MGT, the brewery made the decision to purchase 8 x 7,500ltr Pressure Rated Fermenting Vessels, 1 x 10,000ltr Cold Liquor Tank and 1 x 10,000ltr Hot Liquor Tank

Scope of Project:

- ◆ Design, manufacture and testing of 8 x 7,500ltr AISI 304L Stainless Steel Pressure Rated Fermenting Vessels
- ◆ Design, manufacture and testing of 1 x 10,000ltr AISI 304L Stainless Steel Hot Liquor Tank
- ◆ Design, manufacture and testing of 1 x 10,000ltr AISI 304L Stainless Steel Cold Liquor Tank
- ◆ Pre-delivery assembly and comprehensive testing of all units prior to shipping
- ◆ Full delivery of vessel and agitator to Fourpure Brewery, Bermondsey, London UK
