

Project Overview:

Founded by Sambrook's Brewery, Westerham Brewing Co and The Ramsgate Brewery, South East Bottling was borne out of the individual bottling needs of the founding breweries. Using their combined industry experience of over 30 years they have installed a top of the range bottling line tailored to the needs of the craft brewing sector.

To meet their growing demand from clients and to have the flexibility they require, South East Bottling through their founders individual experience in working with MGT made the decision to purchase from MGT 2 x 5,000ltr 304L AISI Stainless Steel Insulated & Jacketed Pressure Rated Bright Beer Tanks.

Scope of Project:

- ◆ Design, manufacture and testing 2 x 5,000ltr 304L AISI Stainless Steel Insulated & Jacketed Pressure Rated Bright Beer Tanks according to recognised industry standards for the design and manufacture of pressure vessels
- ◆ Pre-delivery assembly and comprehensive testing of all units prior to shipping
- ◆ Full delivery of vessels to South East Bottling facility in Broadstairs, Kent, UK
